Toolbox

Overview

A large toolbox with a capacity of 38 l. It is equipped with two adjustable compartments, one of which is in the form of a carrier so that every tool has its own place. The box is fitted with a flexible seal to provide protection against dust and water ingress. The reinforced construction of the lid and body allows for a high loading capacity. The box can withstand pressures of up to 100 kg, making it possible to create comfortable working platforms. Connectors in the lid allow connection to the rest of the S1 and S12 system.

Key Technical Specifications

Grip	Yes
Handle	No
Weight	5.9 kg
Wheels	No
Capacity	38 l +/-5%
Material	PP
Tightness	IP66
Dimensions	584x385x295 mm
Max. payload	50 kg
Set includes	System box, adjustable divider x2
Compatible with	S1 system (YT-09167, YT-09168, YT-09169, YT-091691, YT-091692, YT-09180, YT-09166, YT-09161, YT-09159, YT-09158)
Number of segments	1
Min. internal width	290 mm
Min. internal height	232 mm
Min. internal length	512 mm
Transportation holder	Yes

Compatible with (continued)	S12 system boxes can be attached to the cover (YT-08973, YT-08974, YT-09163, YT-09164, YT-091681, YT-09170, YT-09171, YT-09175, YT-09178, YT-09179, YT-09183)
