Technical Markers Set 4 pcs / Black-Green-Red-Blue

Overview

Technical markers designed for precise and clear marking on a wide range of surfaces. They ensure the durability of markings and resistance to dirt even in challenging conditions. The markers allow writing on dusty and slightly oily surfaces, making them a practical tool for daily workshop, construction, and installation work. The set includes 4 markers in black, green, blue, and red. The body and cap are made of PP plastic. The intense and durable alcohol-based ink is non-toxic with a short drying time that reduces smudging during marking. The acrylic tip is resistant to clogging, maintains sharpness, does not retract, and does not deform under pressure. The markers do not dry out quickly after removing the cap and provide consistent line quality. An integrated clip allows for easy transport and storage. Suitable for use on glass, metal, ceramics, wood and plywood, rubber, concrete, PVC, OSB boards, and other building materials.

Key Technical Specifications

| Body and cap material | PP plastic                                          |

Key Points

- Set of 4 technical markers: black, green, blue, and red
- Suitable for dusty and slightly oily surfaces
- Alcohol-based, non-toxic ink with short drying time
- Acrylic tip — clog-resistant, maintains sharpness, does not deform under pressure

- 
- Markers do not dry out quickly after cap removal
  - Body and cap made of PP plastic
  - Marker dimensions: 13.5 x 2 x 1.3 cm
  - Integrated clip for easy transport and storage
  - Applicable on glass, metal, ceramics, wood, plywood, rubber, concrete, PVC, OSB boards, and other building materials
