

Yato | Code YT-84927 | Sku 1084927

Chainsaw Guide Bar 3/8" / 0.05" 12"

Overview

YATO YT-84927 brand chainsaw guide bar. Length 12", 44 links, pitch 3/8", groove width 0.05" (1.3 mm). Made from 65Mn manganese steel, which significantly increases resistance to abrasion and overheating, extending service life. The sprocket nose is secured with 4 rivets, ensuring precise installation and increased bar strength. The sprocket nose also features a roller bearing, which guarantees precise chain guidance and minimizes friction during operation. YATO guide bars include a special lubrication system with an oil reservoir; the chain picks up oil and distributes it evenly along the entire length of the bar, reducing operating resistance and improving cooling to greatly extend the life of the entire cutting system. Designed for both home and professional use — suitable for yard and garden work as well as tree felling. Recommended for use with YATO chains YT-84949 or YT-84960; compatible with chains from other manufacturers as well.

Key Technical Specifications

Bearing	yes
Material	65Mn steel
Chain Pitch	3/8" (9.52 mm)
Bearing Type	roller
Groove Width	0.05" (1.3 mm)
Mounting Type	P
Number of Links	44
Guide Bar Length	12" (300 mm)
Number of Rivets	4
Compatible Chains	YT-84949, YT-849495, YT-84960
Guide Bar Thickness	0.322" (8.2 mm)
Compatible Chainsaws	YT-85090, YT-828137, YT-828138
Number of Sprocket Teeth	9

Automatic Chain Lubrication	yes

Key Points

- 12" (300 mm) guide bar length with 44 links
- Pitch 3/8" (9.52 mm), groove width 0.05" (1.3 mm)
- Made from high-durability 65Mn manganese steel for abrasion and heat resistance
- Sprocket nose secured with 4 rivets for precise installation and increased strength
- Roller bearing on sprocket nose for smooth, low-friction chain guidance
- Built-in automatic oil lubrication system for even oil distribution along the bar
- Compatible with YATO chainsaws YT-85090, YT-828137, YT-828138
- Recommended chains: YT-84949, YT-849495, YT-84960; also compatible with third-party chains
- Suitable for home, garden, and professional tree-felling applications

Warnings

- Always use personal protective equipment when operating a chainsaw.
