Rotary Garden Seeder/Spreader for Fertilizer, Sand, Seeds, 25 kg

Overview

Rotary garden spreader for spreading fertilizers, industrial salts, sand, and similar materials. In summer, it can also be used for sowing grass seeds on large and medium-sized surfaces. A soft foam-covered handle and pneumatic wheels make operation easy and comfortable. Dosing is adjusted via a lever mounted on the handle. The set includes a screening sieve and a cover.

Key Technical Specifications

Wheels	yes
Capacity	23 l
Application	grass seeding, fertilization, spreading salt and sand
Set includes	spreader, screening sieve, cover
Working range	3.05–3.66 m
Wheel diameter	350 mm
Wheel quantity	2
Handle material	foam-covered
Max. load capacity	25 kg

Key Points

- Rotary spreader suitable for fertilizers, industrial salts, sand, and grass seeds
- Adjustable dosing via handle-mounted lever for precise application
- Foam-covered soft handle for comfortable grip during extended use
- Two pneumatic wheels (350 mm diameter) for easy maneuverability
- Large 23-liter hopper capacity with a maximum load of 25 kg
- Wide working range of 3.05–3.66 m for efficient coverage

-
- Set includes spreader, screening sieve, and protective cover
