Telescopic Leverage Tree Pruner 2 m

Overview

Combines the highest quality of craftsmanship with modern ergonomics and thoughtful design, offering exceptional comfort and reliability. Telescopic caterpillar pruner with a saw designed for cutting branches up to 35 mm in diameter. The blade is made of durable 65 Mn steel, coated with a PTFE coating on the upper part to reduce friction during cutting. The telescopic handle made of high-quality aluminum alloy allows for length adjustment in two positions, increasing the working range to approximately 3.5 m. The caterpillar mechanism significantly improves cutting efficiency and precision. It evenly distributes pressure, making cutting smooth and requiring less effort from the user, handling tougher and thicker branches. The saw has a profiled design with cross-cut teeth, allowing for precise cutting in both directions. The teeth are inductively hardened and coated with a protective layer.

Key Technical Specifications

Weight	1397 g
Telescopic	Yes
Blade Finish	Upper part PTFE coated
Saw Material	SK5 steel
Working Range	3.5 m
Blade Material	65 Mn steel
Tooth Hardness	63–67 HRC
Handle Material	Aluminum alloy
Saw Blade Length	360 mm
Max. Cutting Diameter	35 mm
Handle Length Settings	1660 mm / 2000 mm

Key Points

- Telescopic caterpillar pruner with integrated saw for branches up to 35 mm in diameter
- Blade made of durable 65 Mn steel with PTFE coating on the upper part to reduce cutting friction
- Caterpillar mechanism evenly distributes pressure for smooth, low-effort cutting of tough branches
- Telescopic high-quality aluminum alloy handle with 2 length settings: 166 cm and 200 cm
- Maximum working range of approximately 3.5 m
- Saw blade made of SK5 steel, 36 cm long, with profiled cross-cut teeth for precise bi-directional cutting
- Inductively hardened teeth (63–67 HRC) with protective coating for long-lasting sharpness

Warnings

- Always use personal protective equipment when working with this tool.
