Screwdriver Bit Set Hex 7 Pcs

Overview

Professional Yato set designed for driving and removing hex-type special screws. The variety of sizes ensures a wide range of work can be performed in specialized mechanical and automotive applications. The bits are 30 mm in length, mounted in a 10 mm hex chuck, and are suitable for use with a 1/2" ratchet. The set is made from the highest quality S2 tool alloy steel, characterized by: high hardness of HRC 58–62, uniform fine-grained material structure, resistance to torsion, and high tightening torque of 21.8 Nm.
