

Yato | Code YT-2050 | Sku 102050

Carpenter's Pliers 150 mm

Overview

The YT-2050 model guarantees durability and versatility. Designed for efficiency in every application, from minor repairs to major construction projects. Precisely pull nails without damage and effortlessly cut wires and electrical cables. The induction-hardened head ensures exceptional durability, while jaws made of high-quality 50CrV steel provide maximum strength. Cold forged for long tool life. Ergonomic PVC handles provide a secure grip. Blade hardness of 55-60 HRC for reliable cutting. Arms hardened to 42-48 HRC for resistance to heavy use. Perfect for construction, service, and hobby work.

Key Technical Specifications

Length	150 mm
Jaw finish	polished
Application	construction
Head finish	induction hardened, polished, blackened
Jaw material	50CrV
Arm toughness	42-48 HRC
Cutter hardness	55-60 HRC
Handle material	PVC
Manufacturing technology	cold forged
Maximum cutting capacity in cold-rolled steel	1.5 mm

Key Points

- Precisely pull nails without damage
- Effortlessly cut wires and electrical cables
- Induction-hardened head for exceptional durability
- Jaws made of high-quality 50CrV steel for maximum strength

- Cold forged for long tool life
- Blade hardness of 55-60 HRC for reliable cutting
- Arms hardened to 42-48 HRC for resistance to heavy use
- Ergonomic PVC handles provide a secure grip
- Length: 150 mm (6 inches)
- Maximum cutting capacity in cold-rolled steel: 1.5 mm

Warnings

- Always use personal protective equipment at work.
