Pipe Wrench, PVC Handle, 900 mm

Overview

900 mm offset pipe wrench with a body made of malleable iron. Strong and notched jaws are made of carbon steel and are characterized by high strength. Easy adjustment of the setting nut allows you to quickly and efficiently adjust the wrench. Widely used in construction, industry, service, and plumbing work.

Key Technical Specifications

|                       |                       |
|-----------------------|-----------------------|
| Size                  | 36"                   |
| Type                  | bent head             |
| Length                | 900 mm                |
| Application           | hydraulic / plumbing  |
| Body Material         | cast iron, PVC        |
| Jaws Hardness         | 55–60 HRC             |
| Jaws Material         | carbon steel          |
| Surface Finish        | blackened, phosphated |
| Max. Pipe Diameter    | 4" (100 mm)           |
| Manufacturing Process | wrought               |

Key Points

- 900 mm offset (bent head) pipe wrench
- Body made of malleable cast iron with PVC handle
- Notched carbon steel jaws with hardness of 55–60 HRC for high strength
- Easy-adjust setting nut for quick and efficient sizing
- Blackened and phosphated surface finish for corrosion resistance
- Maximum pipe capacity: 4" (100 mm)
- Size: 36"

- 
- Suitable for construction, industry, service, and plumbing applications

## Warnings

- Always use personal protective equipment (PPE) when using this tool.
