Universal Wire Stripper

Overview

Automatic wire stripping pliers YT-2268. Quick and automatic stripping mechanism for both flat and round wires with a cross-section from 0.5 mm² to 6.0 mm² and a maximum wire diameter of 10 mm. Adjustable length of stripped insulation from the wire. Working jaw tips made from hardened steel with a hardness level of HRC 55. Capability to cut wire.

Key Technical Specifications

Length	175 mm
Hardness	55 HRC
Functions	Wire cutting, insulation stripping
Application	Electrical
Body Material	Carbon steel
Blade Material	65Mn steel
Surface Finish	Blackened, oxidized
Handle Material	PP, TPR
Cross-Section (AWG)	20–10 AWG
Cross-Section (mm ²)	0.5–6 mm ²
Max. Cutting Diameter	10 mm

Key Points

- Automatic stripping mechanism compatible with both flat and round wires
- Stripping range: 0.5 mm² to 6.0 mm² cross-section (AWG 20–10)
- Maximum wire diameter: 10 mm
- Adjustable stripped insulation length
- Hardened steel jaw tips at 55 HRC for long-lasting cutting performance
- Additional wire cutting capability

-
- Body made from carbon steel with blackened/oxidized surface finish
 - Ergonomic PP/TPR handles for comfortable grip

Warnings

- Always use personal protective equipment (PPE) when working with this tool.
