Yato | Code YT-2316 | Sku 102316

Automatic Wire Stripper

Overview

Automatic insulation stripper pliers YT-2316 with a blackened surface that protects against corrosion. Handles protected by plastic caps. Mechanism for fast and automatic stripping of insulation from both flat and round wires in the range of 1.0 mm² to 3.2 mm². Working jaw tips made of hardened SK5 steel.

Key Technical Specifications

Length	170 mm
Function	Insulation stripper
Application	Electrical
Body material	Carbon steel
Blade material	SK5
Finish	Blackened, oxidized
Handle material	TPR
Cross section (AWG)	18–12
Cross section (mm²)	1–3.2

Key Points

- Automatic insulation stripping mechanism for fast and effortless wire preparation
- Compatible with both flat and round wires in the range of 1.0–3.2 mm² (AWG 18–12)
- Working jaw tips made of hardened SK5 steel for long-lasting cutting performance
- Blackened, oxidized surface finish provides corrosion resistance
- TPR handles with protective plastic caps for comfortable and safe grip
- Overall length: 170 mm

Warnings

- Always use personal protective equipment when working.
