Locking Pliers 250 mm

Overview

YT-2451 locking pliers are an indispensable tool that meets the challenges of the most demanding welding and assembly tasks. They provide a firm grip and exceptional precision. The 250 mm length makes them ideal for various tasks, while the rounded jaws ensure universal use. Screw adjustment allows full control over the jaw opening and enables adaptation to the thickness of the material being gripped for maximum flexibility. Suitable for welding, locksmith, and precise assembly work.
