Pipe Wrench 350 mm

Overview

The YT-2482 Pipe Wrench is designed for professionals in construction, industry, and service. It features a lightweight aluminum body combined with strong, serrated jaws made of chromium-molybdenum steel (CrMo) with a hardness of 55–60 HRC, providing exceptional wear resistance and a secure, stable grip even in the toughest conditions. The wrench is ideal for a wide range of applications including precision hydraulic work, and can handle pipes up to a maximum diameter of 50 mm (2 inches). The jaws are forged for added durability and long service life.

Key Technical Specifications

Size	14"
Length	350 mm
Application	Hydraulic
Jaw Hardness	55–60 HRC
Jaw Material	CrMo (Chromium-Molybdenum Steel)
Body Material	Aluminum
Surface Finish	Surfaced
Maximum Pipe Diameter	2" (50 mm)
Manufacturing Technology	Forged

Key Points

- Lightweight aluminum body for reduced fatigue during use
- Strong serrated jaws with exceptional wear resistance
- Jaws made of chromium-molybdenum steel (CrMo), hardness 55–60 HRC
- Secure and stable grip in demanding conditions
- Suitable for construction, industry, and service applications
- Ideal for precision hydraulic work

-
- Handles pipes up to 50 mm (2") maximum diameter
 - Forged manufacturing technology for enhanced durability

Warnings

- Always use personal protective equipment when working.
