Insulated Screwdriver 1000V PZ2×100 mm

Overview

Cross head screwdriver YT-2826 with VDE insulation, made of durable S2 steel with hardness HRC 56–60. Pozidriv type Phillips screwdriver bit size PZ2, blade length 100 mm. VDE-certified multi-component handle provides insulation up to 1000 V AC. Anti-slip properties thanks to special mini-grooves at the fingertip placement and notches on the handle. The YT-2826 insulated Phillips screwdriver has been tested in a German VDE-accredited inspection institute laboratory and meets the requirements of EN 60900.

Key Technical Specifications

Voltage	1000 V
Hardness	56–60 HRC
Material	S2
Application	Electrical
VDE certified	Yes
Working length	100 mm
Pozidriv (PZ) tip size	PZ2

Key Points

- Pozidriv PZ2 tip for cross head screws
- Blade length: 100 mm
- Made from durable S2 steel with hardness HRC 56–60
- VDE-certified multi-component handle with insulation up to 1000 V AC
- Tested to EN 60900 standard in a German VDE-accredited laboratory
- Anti-slip mini-grooves at fingertip placement and notches on the handle
