

Yato | Code YT-5243 | Sku 105243

Stucco Trowel 80x110 mm

Overview

The YT-5243 stucco trowel is a synonym of precision and durability, essential for every project. Made of high-quality stainless steel ensuring long-lasting performance. Features a special cold-rolled sheet with elasticity up to 2000 N/mm<sup>2</sup> for flexibility and strength. The ergonomic PVC handle provides work comfort. Ideal for professional stucco and finishing work. The precise horseshoe shape facilitates the application of building materials, enabling effective spreading of plasters and putties.

Key Technical Specifications

|                        |                                                                                      |
|------------------------|--------------------------------------------------------------------------------------|
| Size                   | 80x110 mm                                                                            |
| Shape                  | Horseshoe                                                                            |
| Material               | Stainless steel                                                                      |
| Application            | Applying and spreading building compounds on walls during stucco and finishing works |
| Handle Material        | PVC                                                                                  |
| Steel Sheet Elasticity | Up to 2000 N/mm <sup>2</sup>                                                         |

Key Points

- Made of high-quality stainless steel for long-lasting durability
- Cold-rolled steel sheet with elasticity up to 2000 N/mm<sup>2</sup> for flexibility and strength
- Ergonomic PVC handle for enhanced work comfort
- Horseshoe shape for precise application of building materials
- Ideal for professional stucco and finishing work
- Effective for spreading plasters and putties on walls
