Torx Security Screwdriver T30 – YT-25960

Overview

The YT-25960 is a reliable screwdriver designed for working with Torx Security sockets. The shaft is made of high-quality S2 steel hardened to 58 HRC, ensuring exceptional durability. The specialized Torx Security tip features an internal hole for handling security (tamper-resistant) sockets. A satin finish on the shaft provides corrosion protection and an aesthetic appearance. The hardened and sandblasted working end improves tip stability and prevents slipping. The ergonomic two-component handle made of PP and TPR materials ensures a secure and comfortable grip. The tip is magnetic for convenient screw handling.

Key Technical Specifications

Tip	Magnetized
Tip Finish	Sandblasted
Application	Universal
Shaft Hardness	58 HRC
Shaft Material	S2 Steel
Surface Finish	Satin
Working Length	100 mm
Handle Material	PP, TPR
Torx TR Tip Size	T30

Key Points

- Torx Security T30 tip with internal hole for tamper-resistant sockets
- Shaft made of S2 steel hardened to 58 HRC for exceptional durability
- Satin-finished shaft for corrosion resistance and aesthetic appearance
- Hardened and sandblasted working end for improved tip stability and anti-slip performance
- Magnetic tip for convenient screw pick-up and retention

-
- Ergonomic two-component PP/TPR handle for secure and comfortable grip
 - Working length: 100 mm
