Cable Ties 300x7.6mm 50pcs / Black

Overview

The 300x7.6 mm black cable ties are made of PA66 polyamide. Thanks to the use of PA66 polyamide, Yato cable ties are characterized by: enhanced resistance to tearing, very good mechanical properties, and increased UV resistance. The ties feature serrations on one side; by threading the end of the tie through the head, it tightens to the required size. Releasing (opening) without damage is not possible. The close arrangement of the serrations allows precise adjustment of the loop to the circumference of the item being fastened. Suitable for fastening all kinds of items: binding cables, wires, hoses, tubes, packaging, and various objects such as hubcaps, license plates, and many others.

Key Technical Specifications

Size	7.6x300 mm
Color	Black
Material	Nylon PA66 UL 94 V-2
UV resistant	Yes
Melting point	215–225 °C
Oil resistant	Yes
Grease resistant	Yes
Solvent resistant	Yes
Dielectric strength	300 kV/mm
Working temperature	-20 ~ +80 °C
Salt water resistant	Yes
Max. tensile strength	55 kg
Max. cable bundle diameter	80 mm

Key Points

- Material: PA66 polyamide with UL 94 V-2 flammability rating
- Dimensions: 300 mm length x 7.6 mm width
- Maximum tensile strength: 55 kg
- Maximum cable bundle diameter: 80 mm
- Color: Black
- UV resistant, solvent resistant, oil resistant, grease resistant, and salt water resistant
- Dielectric strength: 300 kV/mm
- Working temperature range: -20 ~ +80 °C
- Melting point: 215–225 °C
- Package contains 50 pieces
