Bicycle Set 3

Bicycle Set 3

Bicycle Set 3 is a practical assortment for the independent execution of assembly work and repairs on road bikes, mountain bikes and e-bikes. Especially useful: a Bit-Check (empty) is also included, which can be equipped individually with tools on the way: less weight on bike rides.

Rapid screwdriving

High working speeds can be attained with the Zyklop Mini bit ratchet. The thumb wheel is important, enabling more rapid screwdriving, and the lever of the Zyklop Mini only needs to be used for the final tightening of the screw.

Simple direction change

Simple switching between left/right operations.

TZ-Bits

TZ-Bits are tough viscous bits with a torsion zone. Torsion bits absorb the damaging peak torque loads in the torsion zone. This prevents premature wear and enhances the service life of the bits.

The Zyklop sockets

The Zyklop sockets are suitable for manual and machine-operated tools (non impact). They feature a ball stop groove and knurling at the rear end for manageability during manual use. They are made of chrome-vanadium, matte-chromed. Take it easy tool finder: colour coding by size as well as size stamping - to help you find the required socket quickly and easily.

Safely lever the tyres off of the rim

With the glass fibre reinforced plastic tyre jacks, the tyres can be safely levered off the rim without damaging the rim. Lift off of the rim with one tyre jack, hook into a spoke and pull off the tyre with the second tyre jack. The two tyre jacks can be clicked together and are therefore not lost individually.

The tyre lever 9502 with bit mounting

The 1/4" hexagon mounting in the tyre lever 9502 allows mounting of a 1/4" bit. In this way, light screw connections can be conducted.
