Mfr part no.	90925
SKU	33749
Type	Metal cavity fixing with angle hook for panel building materials
Contents	4 x metal cavity fixing HM 5 x 37 and 4 x angle hook M5 x 45
Gtin Ean	4006209909256
Quantity	4 pcs
Packaging	Blister card
Dimensions	37 mm anchor length
Drill Diameter	10 mm
Spindle Thread	M5
Panel Thickness	6 - 15 mm
Included Hook Dimensions	M5 x 45
Minimum Drill Hole Depth	45 mm
General Suitable Board Thickness Range	3 - 50 mm across the HM range

Description

The fischer HM 5 x 37 WH K NV is a metal cavity fixing with an angle hook for pre-positioned installation in panel building materials. Its expanding arms provide a large contact area behind the board, while the edge claws help prevent rotation during installation. It is suitable for internal applications in gypsum plasterboard, gypsum fibreboard, cavity floor slabs, wood-wool light building boards, chipboard and plywood.

Key Features

- Includes an M5 angle hook
- Suitable for pre-positioned installation
- Expanding arms provide a large supporting surface
- Edge claws help prevent the fixing from rotating
- Suitable for panel thicknesses from 6 to 15 mm
- Can be installed using fischer HM-Z 1 installation pliers or manually
- Suitable for repeated removal and refitting of attached items
- Designed for indoor applications

Applications

- Pictures
- Light shelves
- Mirror cabinets
- Lighting
- Indoor fixtures in gypsum plasterboard
- Indoor fixtures in gypsum fibreboard
- Fixtures in cavity floor slabs
- Fixtures in wood-wool light building boards
- Fixtures in chipboard
