Gas Blow Torch

Overview

The YT-36727 is a reliable gas torch suitable for a wide range of applications, from DIY projects to minor culinary tasks. It offers precise flame control and high flame temperature. Equipped with integrated piezoelectric ignition for easy start-up, stepless flame power adjustment, and a practical lock for continuous operation. Powered by commonly available butane lighter gas with low gas consumption of 9.5 g/h.

Key Technical Specifications

Power	0.13 kW
Gas type	Butane lighter gas
Flame lock	Yes
Application	Heating metal components during assembly of tightly fitted machine and device parts, loosening seized screws, scorching small metal or wooden surfaces, heating, defrosting, drying, shrinking heat-shrinkable materials, bending and warm forming, heat welding and gluing, lighting fireplaces, grills and stoves, gastronomy (baking, caramelizing, decorating)
Piezo ignition	Yes
Gas consumption	9.5 g/h
Flame adjustment	Yes
Flame temperature	1350°C

Key Points

- Integrated piezoelectric ignition for easy, reliable start-up
- Stepless flame power adjustment for precise control
- Maximum flame temperature of 1350°C

-
- Low gas consumption of 9.5 g/h for economical operation
 - Flame lock for continuous hands-free operation
 - Compatible with commonly available butane lighter gas
 - Suitable for heating, defrosting, drying, and shrinking heat-shrink materials
 - Useful for bending and shaping materials, heat welding, and gluing
 - Can be used to loosen seized screws and heat tightly fitted parts during assembly
 - Practical for gastronomy: baking, caramelizing, and decorating dishes
 - Suitable for lighting fireplaces, grills, and stoves

Warnings

- Use only in well-ventilated areas.
- Read the instructions before use.
- Make connections or changes to gas containers in a flameless atmosphere, away from bystanders.
- Wear safety glasses when using this device.
