

Yato | Code YT-61681 | Sku 1061681

Replacement Blade for Rasp YT-61680, 250 mm

Overview

Made of high-quality 65Mn steel. The working part features a rasp surface with a working length of 250 mm and width of 40 mm. Specially shaped holes and profiled cavities prevent clogging when working in various materials, especially in the particularly demanding material of plaster/gypsum. When worn, the blade can be easily replaced by the user. Suitable for sanding gypsum plasterboard, wood-based materials, non-ferrous metals, composites, and aluminum. Attach the blade to the rasp body and use like a file.

Key Technical Specifications

Profile	flat
Material	65Mn steel
Rasp depth	coarse, universal
Application	gypsum boards, wood, non-ferrous metals, steel, laminates, aluminum, composites
Working width	40 mm
Working length	250 mm
Compatible with	YT-61680

Key Points

- Replacement rasp blade compatible with YATO rasp body YT-61680
- Made from high-quality 65Mn steel for durability
- Working length: 250 mm; working width: 40 mm
- Specially shaped holes and profiled cavities prevent clogging
- Coarse, universal rasp depth suitable for a wide range of materials
- Suitable for gypsum boards, wood-based materials, non-ferrous metals, composites, aluminum, and laminates

-
- Flat profile; easy user replacement when worn

Warnings

- Always use personal protective equipment (PPE) when working.
