AIR WEDGE

Overview

Pneumatic mounting cushion. Designed for positioning heavy components weighing up to 135 kg. Allows easy movement, lifting, moving, and leveling of furniture, window or door frames, washing machines, refrigerators, parts, and appliances in various technical works. The cushion features a durable control valve made entirely of metal. Cushion material: reinforced polypropylene in black. Method of use: Place the empty cushion (approximately 2 mm thick) in the desired location, close the control valve, and using the pump at the end of the hose, force air into the cushion causing it to inflate and move the object. To remove the cushion, gradually turn the valve to release the air.

Key Technical Specifications

Size	150x160 mm
Material	TPU
Application	For lifting and leveling heavy elements
Lifting height	0-50 mm
Max. lifting capacity	135 kg

Key Points

- Supports heavy components weighing up to 135 kg
- Lifting height range: 0–50 mm
- Size: 150×160 mm
- Durable all-metal control valve
- Made from TPU reinforced polypropylene
- Suitable for furniture, door/window frames, washing machines, refrigerators, and more
- Deflated thickness of approximately 2 mm for easy insertion
