Universal Puller Set

Overview

Professional set for removing large bearings, pulleys, and gears. The components of the set allow assembly of the following configurations: two-arm pullers with 100/200 mm and 250 mm arm lengths in both internal and external versions, and three-arm pullers with 100/200 mm and 250 mm arm lengths in both internal and external versions. The set can replace twelve different pullers.

Key Technical Specifications

Pieces	12
Material	#45 carbon steel
Application	For bearings
Finish	Chrome plated
Technology process	Wrought
