Poker Shaft for YT-82600 Concrete Vibrator

Overview

The YT-82595 vibrating poker shaft is designed for use with the YT-82600 concrete vibrator. Its solid construction and optimized parameters make it an indispensable tool on any construction site. The 300 cm length allows access to hard-to-reach areas, while the 35 mm head diameter ensures optimal compaction efficiency. It effectively eliminates air bubbles and voids in concrete, increases the strength and durability of poured structures, ensures a uniform and smooth surface after curing, and guarantees better adhesion of reinforcement to the concrete mass.

Key Technical Specifications

Length	3 m
Material	metal, rubber
Application	Compacting concrete mix
Head diameter	35 mm
Compatible with	YT-82600

Key Points

- Compatible with YT-82600 concrete vibrator
- Length: 300 cm (3 meters) for access to hard-to-reach areas
- Head diameter: 35 mm for optimal compaction efficiency
- Effectively eliminates air bubbles and voids in concrete
- Increases strength and durability of poured concrete structures
- Ensures uniform and smooth surface after curing
- Improves adhesion of reinforcement to the concrete mass
- Constructed from high-quality metal and rubber
