Magnetic Sweeper 600mm

Overview

The magnetic sweeper is a tool for removing metal filings, shavings, and picking up small metal parts. It is well suited for use in workshops, warehouses, and on construction sites. Thanks to its powerful ferrite magnet, it enables fast and effective cleaning of surfaces without the need for manual collection. The aluminium construction is durable and lightweight, while the telescopic handle and large wheels make it easy to manoeuvre in various conditions.

Key Technical Specifications

Material	Aluminium, ferrite magnet
Dimensions	600 × 75 × 101 mm
Magnet type	Ferrite, anti-corrosive
Magnetic force	12–22 kg (30–50 lbs)
Wheel diameter	180 mm
Telescopic handle	Yes
Handle length (telescopic)	760–1130 mm

Key Points

- Removes metal filings, shavings, and small metal parts quickly and effectively
- Powerful anti-corrosive ferrite magnet with magnetic force of 12–22 kg (30–50 lbs)
- Lightweight and durable aluminium construction
- Telescopic handle adjustable from 76 to 113 cm
- Large 18 cm diameter wheels for easy manoeuvring
- Ideal for workshops, warehouses, and construction sites
- Sweeping width: 600 mm
