

Yato | Code YT-24232 | Sku 1024232

Hybrid Air Hose 1/4" 30 m

Overview

The YT-24232 hybrid pneumatic hose provides stable and efficient power supply for pneumatic tools. It is indispensable in professional workshops and manufacturing facilities. The hose is highly flexible, making maneuvering and storage easier, and is resistant to high and low temperatures for stable operation. It offers increased resistance to stretching and abrasion to extend product lifespan, as well as resistance to aggressive chemicals. The hose is equipped with crimped, standard threaded connections reinforced with a rubber collar. Its vivid blue color makes it easy to locate in the workshop.

Key Technical Specifications

Length	30 m
Material	PVC Hybrid + NBR
Thread Size	G1/4 BSPT
Inner Diameter	6.5 mm
Max. Working Pressure	2 MPa (20 bar)

Key Points

- Highly flexible design for easy maneuvering and storage
- Resistant to high and low temperatures for stable operation
- Increased resistance to stretching and abrasion for extended lifespan
- Resistant to aggressive chemicals
- Crimped threaded connections reinforced with a rubber collar
- Vivid blue color for easy identification in the workshop
- Maximum working pressure: 2 MPa (20 bar)
- Length: 30 m, Inner diameter: 6.5 mm, Thread: G1/4 BSPT
