INTERCHANGEABLE FORK SPRING COMPRESSOR AND REMOVAL TOOL

Overview

Professional McPherson springs with replaceable handles. 7-element set. The set is intended for replacing McPherson suspended shock absorbers. The welt has replaceable handles that allow springs operating with a diameter of 65 mm to 212 mm. Material: CRMO SCM415 alloy steel, phosphate surface. A single -column puller with a diameter of a 45 mm pipe. Drive: 21 mm screw with a small, trapezoidal thread. Three -point, adjustable handles adapted to the curvature of the spring. Adjustment in the range: 65 mm - 125 mm, 88 mm - 160 mm, 126 mm - 212 mm. Total length 400 mm (spring height 300 mm). Maximum pressure of the welt: 1500 kg. Usage warnings: Warning! Always use personal safety equipment at work.

Key Technical Specifications

Length	400 mm
Material	#45 carbon steel
Mounting	3-point
Application	for MacPherson springs
Socket size	21 mm
Set includes	single-column puller, handle x3
Finish	phosphated
Working length	300 mm
Working capacity	65-125, 88-160, 126-212 mm
Max. force pressure	1500 kg
