CERAMIC TILES CHAMFER MACHINE

Overview

Guide for grinding the edge of ceramic tiles. It allows for precise guidance of a machining tool, such as a saw or a grinder. The body of the guide is made of aluminum and equipped with plastic rollers to facilitate smooth sliding on the beveled tile. The guide is designed to precisely position the plate when grinding the edge at a 45° angle. Grinding is done with an angle grinder or other device. Usage warnings: Warning! Always use personal safety equipment at work.

Key Technical Specifications

Size	250x170 mm
Material	aluminum (body), nylon (rolls)
Application	for grinding the edges of ceramic tiles
Operation angle	45
