Synthetic Leather Anti-Callus Protection Work Gloves Size 10

Overview

Work gloves with additional reinforcements recommended for working with hand tools, impact power tools, or for example, laying cobblestones. Made of synthetic leather, double-layered fabric with spandex and neoprene. Synthetic leather with additional reinforcements in the grip area ensures high durability and a good fit to the hand. Cushions protect against calluses. Neoprene on the knuckles stretches and moves with hand movements. The double-layered fabric on the top part made of durable nylon with added material giving it elasticity not only provides good protection against mechanical hazards but also high work comfort.

Key Technical Specifications

Size	10
Pairs	1
Material	Synthetic leather, PU, spandex
Protection Category	I

Key Points
