# Pruning Shears 18V, 30 mm, 60 Cuts/min - Body Only

## Overview

The battery-powered pruning shears are designed for professional use in orchards and private gardens. Lightweight and well-balanced, they guarantee comfortable use during prolonged work sessions. The compact size allows easy maneuvering among dense branches. A powerful brushless motor ensures fast operation at up to one cut per second. Top-quality SK5 steel blades deliver clean and precise cuts. The secateurs are equipped with a built-in light to illuminate the working area. Powered by a rechargeable battery from the 18V system common to YATO's cordless tool series. A safety device prevents accidental activation — the tool switches to sleep mode after 30 seconds of inactivity, and requires holding the trigger for 5 seconds to start. Cutting diameter: fresh branches 30 mm, dry branches 25 mm. Cutting frequency: 60 cuts per minute. Overload protection guards against overheating. Set includes: pruner, 3-piece wrench set (socket, hex key, screwdriver), blade sharpening oil stone, and oil.

## Key Technical Specifications

|                   |                                                      |
|-------------------|------------------------------------------------------|
| Voltage           | 18 V DC                                              |
| Blade Type        | Rounded                                              |
| Motor Type        | Brushless                                            |
| Vibrations        | 1.5 ± 1.5 m/s <sup>2</sup>                           |
| Application       | Cutting branches, trimming trees and shrubs          |
| Soft Handle       | Yes                                                  |
| Battery Type      | Li-Ion                                               |
| Set Includes      | Pruner, socket wrench, hex key, whetstone 76×6×12 mm |
| Acoustic Power    | 78.0 ± 3.0 dB(A)                                     |
| Blade Material    | SK5                                                  |
| Battery Included  | No                                                   |
| Charger Included  | No                                                   |
| Acoustic Pressure | 67.0 ± 3.0 dB(A)                                     |

|                                               |             |
|-----------------------------------------------|-------------|
| <b>Cutting Frequency</b>                      | 60 cuts/min |
| <b>Overheat Protection</b>                    | Yes         |
| <b>Weight (without battery)</b>               | 0.9 kg      |
| <b>Electrical Insulation Class</b>            | III         |
| <b>Max. Cutting Diameter (Dry Branches)</b>   | 25 mm       |
| <b>Max. Cutting Diameter (Fresh Branches)</b> | 30 mm       |

## Key Points

- Brushless motor for fast, efficient cutting — up to 60 cuts per minute
- SK5 steel blades for clean and precise cuts
- Maximum cutting diameter: 30 mm (fresh branches), 25 mm (dry branches)
- Built-in work light illuminates the cutting area
- Safety sleep mode activates after 30 seconds of inactivity; 5-second trigger hold required to start
- Overload and overheat protection for extended tool life
- Compatible with YATO 18V Li-Ion battery system (battery not included)
- Lightweight at 0.9 kg for reduced fatigue during prolonged use
- Rounded blade type with soft handle for comfortable grip
- Includes socket wrench, hex key, whetstone (76×6×12 mm)

## Warnings

- Battery not included — requires separate purchase of a compatible YATO 18V Li-Ion battery
- Charger not included
- Weight listed is without battery
