Key Technical Specifications

Type	Furniture Magnets
Depth	30 mm
Width	28 mm
Colour	Grey
Height	10 mm
Weight	0.007 kg
Load Capacity	3,5 kg

Key Points

- **FUNCTIONALITY:** The furniture magnet ensures the fixation of doors or cabinet doors and prevents them from opening spontaneously. Thanks to the firm closing of the doors, the magnets guarantee reliability and functionality of the furniture – e.g. for food storage.
- **USE:** This type of magnet is suitable, for example, for bathroom cabinets or places where the strike plate cannot be screwed in.
- **QUALITY:** The material of the furniture magnet housing is made from high-quality and durable plastic, while the strike plate is made from galvanised steel.
- **EASY INSTALLATION:** The housing is mounted by screwing in; the strike plate is self-adhesive. The appropriate number of magnets depends on the size of the objects being fixed and the load capacity of the magnet.
