Bolt 70x38mm, galvanised

Overview

A furniture bolt with a width of 70 mm and a height of 38 mm with a round slider for easy closing of doors, cabinets, gates, and entrances. The length of the slider in the extended position is 27 mm. A strike plate can be used with the bolt. Thanks to the anti-corrosion surface treatment by galvanising, it can also be used in outdoor areas.

Key Technical Specifications

Finish	Galvanised

Key Points

- This metal furniture bolt will be an excellent helper when closing and securing gates, entrances, cabinets, etc. It is ideal for garden shelters, storage units or your garage.
- Quality: The furniture bolt is made of high-quality metal and subsequently galvanised. This makes it suitable for both indoor and outdoor use.
- Easy installation: Simply attach the bolt using 4 screws to a window or door, and the strike plate using two screws to the surface. Everything is done quickly! It can be installed horizontally or vertically.
