Key Technical Specifications

Type	Furniture Magnets
Depth	19 mm
Width	65 mm
Colour	White
Height	15 mm
Weight	0.044 kg
Load Capacity	8 kg

Key Points

- **FUNCTIONALITY:** The furniture magnet ensures the fixation of doors or cabinet doors and prevents them from opening spontaneously. Thanks to the firm closure of the doors, the magnets guarantee reliability and functionality of the furniture – e.g. for food storage.
- **VERSATILE USE:** Particularly suitable for door frames – can be mounted on the vertical, top or bottom side of the frame. Also suitable for cabinets.
- **QUALITY:** The housing of the furniture magnet is made from high-quality, durable plastic, while the counter plate is made from galvanised steel.
- **EASY INSTALLATION:** Simply mount the housing and counter plate at the same level by screwing them in. The appropriate number of magnets depends on the size of the objects being secured and the load capacity of the magnet.
