Key Points

- The flanged barrel nut with metric thread M6 is an ideal solution for strong and reusable connections in wooden materials. Thanks to its self-tapping design, it creates a stable thread directly in the wood without the need for pre-drilling.
- Strength and stability – Provides a durable threaded connection suitable for furniture assembly and wooden structures. Self-tapping design – Allows easy installation without pre-drilling. Versatile use – Suitable for solid wood, chipboard and MDF, with the option of installation in various directions. Quality material – Made from galvanised steel for high corrosion resistance and long service life. Wide range of sizes – Available in various variants to meet specific assembly requirements.
- This nut is an ideal choice for carpenters, craftsmen and professional furniture manufacturers. Rely on a quality connection that lasts!
