## Set for Simple Shelf Rusticline

### Overview

NEW! A unique assembly set for making a simple shelf from the Rusticline pipe shelving system. Vintage design: Stands out in interiors styled with a rustic, industrial or modern feel. Easy assembly: All components needed for assembly are found inside special ECO packaging! Accessories for complete wall mounting are available. A wooden shelf is not included in the package — choose one to your own taste. TIP: We have also included PTFE thread seal tape to help you tighten the individual joints so that all components are firmly connected. The Rusticline pipe system is intended for decorative purposes only and does not function as water piping.

### Key Technical Specifications

|          |                            |
|----------|----------------------------|
| Depth    | 280 mm                     |
| Width    | 400 mm                     |
| Colour   | Black                      |
| Height   | 45 mm                      |
| Weight   | 1.465 kg                   |
| Material | Steel, Malleable cast iron |

### Key Points

- Rusticline pipe system:
- Step into the role of interior designers and build shelves, racks, wardrobes or tables to your own taste. The Rusticline shelving system offers unlimited possibilities for combining individual elements in a water pipe design.
- Industrial style has a firm place in contemporary interior design. It is built on dark colour schemes and the use of structural elements and building materials. Our Rusticline shelving system stands on these same pillars. It draws on water pipe elements and transforms their original purpose.

- Given the emphasis on the decorative nature of the pipe system, each component is thought through to the last detail. You will find embossed marks, protruding features and a characteristic grainy surface that imitates the look of cast iron. Original decorative accents include shut-off valves and taps that catch the eye at first glance.
- Pipes, elbows, flanges, couplings and other Rusticline system elements can be freely combined. This makes it easy to create home accessories or unique pieces of furniture that fit the interior perfectly in both shape and size.
- On the other hand, there is no point in laboriously designing products that someone else has already thought up. That is why we have prepared assembly sets containing all components including installation hardware. Products with shelves do not have pre-drilled holes, so the placement of support elements is flexible. Furniture and accessories from the sets can therefore be easily customised to suit you.
- A pantry shelving unit, a wall-mounted shelf, a wall coat rack... The list of all possible uses for the Rusticline system would be truly long!
- Thanks to the stable construction and easy attachment of boards, the pipe system is ideal above all for making shelving units and shelves of various sizes.
- The system also finds its use in creating original furniture. The pipes can serve as legs for a coffee table or as the base of an original bar stool. The elements are also suitable for making home accessories such as a wine rack or a towel holder.
- With a little skill you can also combine the components with other materials and objects, such as solid wood boards or lighting elements (bulbs, LED strips). Awaken your creative spirit and become an innovator. With Rusticline elements, the doors are open.
- The actual assembly of the furniture or accessories takes only a moment. The pipes, couplings and other parts are threaded, so they simply need to be screwed together. The flanges are then screwed to the boards or into the wall with screws and you are done.
- For all assembly sets we have prepared clear installation guides, which can be found on the Rusticline website. Even without prior experience you can easily assemble larger pieces of furniture, such as a work desk:
- The Rusticline shelving system is designed not only to look attractive but also to withstand everyday use and heavier loads.
- The components are made from solid steel and surface-finished with powder coating. This is resistant to scratches, water and cleaning agents. You can easily use your products in the bathroom or kitchen as well. The pipes will also withstand the claws of pets and will retain their eye-catching industrial-style appearance for many years to come.
- Has the concept of the pipe shelving system caught your interest? Get creating! A great deal of inspiration can be found on the Pinterest board we have carefully put together for you. You will be surprised by everything that can be made from a few water pipes, elbows, couplings and taps.
