Shelf Set Rusticline

Overview

NEW! A unique assembly for stylish shelves from the Rusticline tube shelving system. Here the tube system perfectly serves as brackets. Suitable for a board with a maximum depth of 300 mm. Vintage design: Stands out in interiors styled in a rustic, industrial or modern aesthetic. Easy assembly: All components needed for assembly are found inside special ECO packaging! Accessories for complete wall mounting are available. The wooden shelf is not included in the package — choose it according to your own taste. TIP: We have also included PTFE thread seal tape to help you tighten the individual joints so that all components are firmly connected. The Rusticline tube system is for decorative purposes only and does not function as water piping.

Key Technical Specifications

Depth	300 mm
Width	400 mm
Colour	Black
Height	45 mm
Weight	1.225 kg
Material	Steel, Malleable cast iron

Key Points

- Rusticline tube system:
- Step into the role of interior designers and build shelves, racks, wardrobes or tables to your own taste. The Rusticline shelving system offers unlimited possibilities for combining individual elements in a water pipe design.
- The industrial style has a firm place in contemporary interior design. It builds on dark colour schemes and the use of structural elements and construction materials. Our Rusticline shelving system stands

on these same pillars. It uses elements of water piping and transforms their original purpose.

- Given the emphasis on the decorative nature of the tube system, each individual component is thought through to the last detail. You will find embossed markings, protrusions and a characteristic grainy surface that imitates the look of cast iron. Unique decorative accents include shut-off valves and taps that catch the eye at first glance.
- Pipes, elbows, flanges, connectors and other Rusticline system elements can be combined freely. This makes it easy to create home accessories or original pieces of furniture that fit perfectly into your interior in both shape and size.
- On the other hand, there is no point in laboriously designing products that someone has already thought of before you. That is why we have prepared ready-to-assemble sets that contain all components including installation materials. Products with shelves do not have pre-drilled holes, so the placement of load-bearing elements is flexible. You can easily customise furniture and accessories from the sets to suit yourself.
- A shelf unit for the pantry, a wall-mounted shelf, a wall coat rack... The full list of possible uses for the Rusticline system would be truly long!
- Thanks to its stable construction and easy board attachment, the tube system is ideal above all for making shelves and racks of various sizes.
- The system also finds its use in the creation of original furniture. The tubes can serve, for example, as legs for a coffee table or as the base of an original bar stool. The elements are also suitable for making home accessories such as a wine rack or a towel holder.
- With a little skill, you can combine the components with other materials and objects, such as solid wood boards or lighting elements (bulbs, LED strips). Awaken your creative spirit and become an innovator. With RusticLine elements, the door is open.
- The actual assembly of the furniture or accessories will take only a moment. The pipes, connectors and other parts are threaded, so all you need to do is screw them together. The flanges are then screwed to the boards or into the wall using wood screws and you are done.
- For all ready-to-assemble sets we have prepared clear installation guides, which you can find on the Rusticline website. You will have no trouble assembling even larger pieces of furniture, such as a work desk, without any prior experience:
- The Rusticline shelving system is designed not only to look attractive but also to withstand everyday use and heavier loads.
- The components are made of solid steel and finished with powder coating. This coating is resistant to scratching, water and cleaning agents. You can use your products in the bathroom or kitchen without any issues. The pipes will also withstand the claws of pets and will retain their striking industrial appearance for many years.
- Has the concept of the tube shelving system caught your attention? Start creating! A generous dose of inspiration can be found on the Pinterest board we have carefully put together for you. You will be surprised by everything that can be made from a few water pipes, elbows, connectors and taps.
