

Yato | Code YT-82542 | Sku 1082542

HEAT RESISTANT TAPE 20MM 300C

Overview

Reliable electronics protection. Protect your delicate electronic components with YT-82542 kapton tape. Essential for hot air repairs, it ensures safety and surface cleanliness. Maximum protection for delicate components. Effective protection of electronic components from high temperatures. Ideal for securing composite housings of sockets, plugs, and connectors. Essential for repairs using hot air. Resistant to a wide range of chemicals, increasing versatility of use. Silicone adhesive leaves no residue, ensuring an aesthetic finish. Maintains properties even at 300°C for a minimum of 10 seconds in direct contact. Material: polyamide, silicone adhesive. Width: 20 mm. Length: 33 m. Temperature resistance: up to 300°C. Chemical resistance: yes.

Key Technical Specifications

Brand	Yato
Width	20 mm
Length	33 m
Symbol	YT-82542
Material	polyamide, silicone adhesive
Application	protects electronic components such as composite housings for sockets, plugs, connectors, and other delicate parts from high temperatures during repairs using hot air
Producer code	5906083076015
Chemical resistance	yes
Temperature tolerance	up to 300 C

Key Points

- Effective protection of electronic components from high temperatures
- Ideal for securing composite housings of sockets, plugs, and connectors
- Essential for repairs using hot air
- Resistant to a wide range of chemicals, increasing versatility of use
- Silicone adhesive leaves no residue, ensuring an aesthetic finish
- Maintains properties even at 300°C for a minimum of 10 seconds in direct contact
- Material: polyamide, silicone adhesive
- Width: 20 mm
- Length: 33 m
- Temperature resistance: up to 300°C
- Chemical resistance: yes
