Yato | Code YT-0610 | Sku 100610

DISC BRAKE SPREADER 0-65 MM

Overview

The spreader is used to retract the pistons of disc brakes. It has been equipped with a hexagonal socket with a size of 21 mm and a square socket with a size of 1/2" (12.5 mm). This allows the use of a wrench, which ensures the application of much greater forces than in the case of a knob. It is possible to extend the pistons to a maximum of 65 mm. Along with the spreader is supplied a bottle of machine oil for lubricating the threads of the spreader. Usage warnings: Warning! Always use personal safety equipment at work.

Key Technical Specifications

Brand	Yato
Symbol	YT-0610
Material	carbon steel
Application	for disc brakes
Holder size	1/2" (12.7 mm)
Socket size	21 mm
Producer code	5906083906107
Working capacity	0-65 mm

Key Points

- Hexagonal socket with a size of 21 mm
- Square socket with a size of 1/2" (12.5 mm)
- Extends pistons to a maximum of 65 mm
- Made of carbon steel
- Supplied with a bottle of machine oil for lubricating the threads

Warnings

- Warning! Always use personal safety equipment at work.
