Universal Clutch Alignment Centering Tool

Overview

Clutch Disc Centering Kit. A practical kit designed for precise, axial seating of the clutch disc. It allows easy installation, locking and centering of the clutch disc relative to the pressure plate and flywheel on cars and light trucks. Elements are made of high quality materials, with size adjustment via a knob. Included are 2 spacer sleeves for different diameters of bearings seated in the crankshaft and 1 expansion sleeve with an extra large adjustment range for shafts without a clutch shaft support bearing.

Key Technical Specifications

Pcs	4
Brand	Yato
Symbol	YT-06313
Material	nylon, steel
Application	for centering the clutch disc, for passenger cars
Set includes	body, reducing sleeve x3
Producer code	5906083048944
Internal diameter	15-28 mm
