TROLLEY TOOL BACKPACK WITH HARD BASE 27L

Overview

Tool backpack with a capacity of 27 liters with reinforced, waterproof bottom, combines the functionality of a classic backpack with the mobility of a transport bag, making it suitable for both field work and organizing tools in the workshop. The construction based on durable technical polyester 600D provides resistance to abrasion, moisture, and daily loads, making it a practical equipment for professionals looking for solid and easy to maintain gear. At the base, two wheels and a telescopic, retractable handle in the upper part were used, allowing for quick transformation of the backpack into a convenient transport suitcase. This solution relieves the spine when carrying a heavier set of tools. Wide, adjustable shoulder straps ensure comfort when carrying in a traditional way, evenly distributing the weight even when fully loaded. Dimensions of 35 x 27.5 x 50.5 cm provide space for safe placement of power tools, accessories, and small mounting elements. The stable construction with dividers, hooks, and zippered pockets helps maintain order and protects equipment from damage during transport. This is a universal solution for installers, service technicians, and DIY enthusiasts who expect a combination of durability, comfort, and practical mobility during safe and organized tool transport.

Key Technical Specifications

Grip	extendable
Brand	Yato
Symbol	YT-74287
Wheels	yes
Capacity	27 l
Material	OXFORD 600D polyester
Dimensions	350x275x505 mm
Producer code	5906083125263
Wheel quantity	2
Transportation holder	yes

Key Points

- 27 l capacity allows for transporting a set of tools and accessories needed in daily work
- Durable technical polyester 600D increases resistance to abrasion, moisture, and damage
- Reinforced bottom made of PP maintains resistance to water and mechanical factors
- Wide, adjustable shoulder straps ensure comfort when carrying on the back
- Detachable straps allow for quick transformation of the backpack into a convenient suitcase
- 2 transport wheels allow for carrying a heavier load without burdening the back
- Telescopic, retractable handle allows for using the backpack as a wheeled suitcase
- Stable construction with separate pockets and dividers promotes safe storage of contents, protecting them during transport
- Dimensions of 35 x 27.5 x 50.5 cm offer space for hand tools, power tools, and small mounting elements
