

Yato | Code YT-8835 | Sku 108835

BY-PASS LOPPING SHEAR 780 MM

Overview

Effortless Precision Cutting Discover the YT-8835 pruner, designed to make cutting thick branches easy and comfortable. This reliable tool is perfect for efficiently trimming branches up to 44 mm in diameter. Efficient Cutting of Thick Branches Effective cutting of thick branches from trees and shrubs Exceptional length of 78 cm provides greater reach Ergonomically designed handle ensures a secure grip and minimizes fatigue Blade made of high-carbon SK5 steel resistant to cracking, chipping, and wear Upper blade surface coated with PTFE to minimize friction and enhance comfort Maximum cutting diameter of 44 mm for versatile applications Equipped with a shock-absorbing "pad" for added cutting comfort Practical hangers on the handles facilitate tool storage Precision Blade Durable SK5 Steel PTFE Coating For Thick Branches Cutting Diameter up to 44 mm Technical Specifications: Total Length: 780 mm Handle Material: Steel with TPR elements Blade Material: High-carbon steel #1050 (SK5) Blade Finish: Upper blade coated with PTFE Blade Type: Anvil Maximum Cutting Diameter: 44 mm Usage warnings: Warning! Always use personal safety equipment at work.

Key Technical Specifications

Lock	no
Brand	Yato
Length	780 mm
Symbol	YT-8835
Blade type	anvil
Blade finish	upper PTFE coated
Producer code	5906083988356
Blade material	carbon steel #1050
Handle Material	steel, TPR
Max. cutting diameter	44 mm

Key Points

- Effective cutting of thick branches from trees and shrubs
- Exceptional length of 78 cm provides greater reach
- Ergonomically designed handle ensures a secure grip and minimizes fatigue
- Blade made of high-carbon SK5 steel resistant to cracking, chipping, and wear
- Upper blade surface coated with PTFE to minimize friction and enhance comfort
- Maximum cutting diameter of 44 mm for versatile applications
- Equipped with a shock-absorbing "pad" for added cutting comfort
- Practical hangers on the handles facilitate tool storage
- Total Length: 780 mm
- Handle Material: Steel with TPR elements
- Blade Material: High-carbon steel #1050 (SK5)
- Blade Finish: Upper blade coated with PTFE
- Blade Type: Anvil
- Maximum Cutting Diameter: 44 mm
