It is lightweight and rust-resistant, does not crack, and is easy to clean. The grate rods are thick (up to 4 mm) and spaced closely (only 14 mm apart), ensuring better contact between food and the grate and preventing smaller ingredients from falling into the fire pit. Bowl - Outer Layer Deep bowl with over 20 ventilation holes ensures excellent air circulation. There is no direct contact with the embers, charcoal, and fire, preventing it from burning through, maintaining its appearance, and lasting for many years. Bowl - Middle Layer Enamelled bowl with 2 handles, painted black. Additional holes provide ventilation and improve air circulation. Serves as the fire pit. Bowl - Inner Layer Galvanized coal grate. Limits contact of embers with the fire pit, extending the grill's lifespan and providing better temperature control. Ensures additional air circulation. Lid with Thermometer The grill lid is made of powder-coated steel in blue. The lid features a built-in thermometer for convenient temperature monitoring at every stage of grilling. Handle and Ventilation in the Lid Additional ventilation holes in the lid allow for better smoke control. Thermally insulated handle made of BAKELITE and stainless steel allows for safe removal of the lid during grilling. Additional Hook At the

back of the grill, a large, convenient hook allows you to hang the lid on the side of the bowl. Depending on your preferences and the stage of food preparation, grilling can be done with the lid closed or open.

**Dimensions and Weight** Grill Dimensions: 65.5 x 63 x 104.5 cm Main bowl: ø 56.5 cm Lower shelf size: 48 x 54 cm Wheel diameter: 16.5 cm Weight: approx. 10 kg Grate Dimensions: Fire pit: ø 54.5 cm x 17 cm Coal grate diameter: 40 cm Grate height: 82 cm Grate diameter: 54 cm Fire pit depth: 10.5 cm Distance between grate rods: 14 mm Thickness of Components: Coal bowl: 1 mm Grate rods: 4 mm Coal grate rods: 2.5 mm Other components: above 0.7 mm Safety: The product has been tested and approved for contact with food – it has an LFGB report that complies with European Regulation 1935/2004 The product meets all dimensions and features according to the standard for charcoal grills EN 1860-1:2013 + A1:2017 Standard EN 1860-1:2013 + A1:2017 – concerns, among other things, such essential elements of the grill as: minimum thickness of the sheet for all elements including the fuel bowl, lid, and ashtray minimum distance between grate rods of 20 mm minimum depth of the fuel bowl of 6 cm presence of handle(s) for the grate (if the grate is not mechanically moved) size of the handles for the lid and grate stability flammability WATCH THE VIDEO

## Key Points

- XXL chrome-plated grill grate with a diameter of 54 cm
- Unique 3-layer bowl with a handle - ensures excellent air circulation
- Sturdy lid with a thermometer, ventilation hole, handle, and hook
- Grill made of powder-coated steel, available in 5 trendy colors
- Lightweight construction (weight: approx. 10 kg)
- Stable legs, including 2 equipped with transport wheels - easily move the grill to any spot in the garden or terrace
- Lower shelf for easy organization and storage (e.g., accessories or charcoal)
- Shutter regulating air circulation
- Main bowl: ø 56.5 cm
- Lower shelf size: 48 x 54 cm
- Wheel diameter: 16.5 cm
- Weight: approx. 10 kg
- Fire pit: ø 54.5 cm x 17 cm
- Coal grate diameter: 40 cm
- Grate height: 82 cm
- Grate diameter: 54 cm
- Fire pit depth: 10.5 cm
- Distance between grate rods: 14 mm
- Coal bowl: 1 mm
- Grate rods: 4 mm
- Coal grate rods: 2.5 mm
- Other components: above 0.7 mm
- The product has been tested and approved for contact with food – it has an LFGB report that complies with European Regulation 1935/2004
- The product meets all dimensions and features according to the standard for charcoal grills EN 1860-1:2013 + A1:2017
- minimum thickness of the sheet for all elements including the fuel bowl, lid, and ashtray
- minimum distance between grate rods of 20 mm
- minimum depth of the fuel bowl of 6 cm
- presence of handle(s) for the grate (if the grate is not mechanically moved)
- size of the handles for the lid and grate
- stability

- 
- flammability
