It is lightweight and rust-resistant, does not crack, and is easy to clean. The grate rods are thick (up to 4 mm) and spaced closely together (only 14 mm apart), ensuring better contact between food and the grate and preventing smaller ingredients from falling into the fire pit. Bowl - Outer Layer A deep bowl with over 20 ventilation holes ensures excellent air circulation. It does not come into direct contact with the embers, charcoal, and fire, ensuring it won't burn through, looks good, and lasts for many years. Bowl - Middle Layer Enamelled bowl with 2 handles, painted black. Additional holes provide ventilation and improve air circulation. Serves as the fire pit. Bowl - Inner Layer Galvanized coal grate. Reduces contact between the embers and the fire pit, extending the grill's lifespan and providing better temperature control. Ensures additional air circulation. Lid with Thermometer The grill lid is made of powder-coated steel in green. The lid features a built-in thermometer for convenient temperature monitoring at every grilling stage. Handle and Ventilation in the Lid Additional ventilation holes in the lid allow for better smoke control. Thermally insulated handle made of BAKELITE and stainless steel allows for safe removal of the lid during grilling. Additional Hook At the

back of the grill, a large, convenient hook allows for hanging the lid on the side of the bowl. Depending on preferences and the stage of food preparation, grilling can be done with the lid closed or open.

**Dimensions and Weight** Grill Dimensions: 65.5 x 63 x 104.5 cm Main bowl: ø 56.5 cm Size of lower shelf: 48 x 54 cm Diameter of wheels: 16.5 cm Weight: approx. 10 kg Grate Dimensions: Fire pit: ø 54.5 cm x 17 cm Diameter of coal grate: 40 cm Height of grate: 82 cm Diameter of grate: 54 cm Depth of fire pit: 10.5 cm Distance between grate rods: 14 mm Thickness of Components: Coal bowl: 1 mm Grate rods: 4 mm Coal grate rods: 2.5 mm Other components: above 0.7 mm Safety: The product has been tested and approved for contact with food – it has an LFGB report that complies with European Regulation 1935/2004 The product meets all dimensions and features in accordance with the standard for charcoal grills EN 1860-1:2013 + A1:2017 EN 1860-1:2013 + A1:2017 Standard – concerns, among other things, such essential elements of the grill as: Minimum thickness of the sheet metal of all elements, including the fuel bowl, lid, and ashtray Minimum distance between grate rods of 20 mm Minimum depth of the fuel bowl of 6 cm Presence of handle(s) for the grate (if the grate is not mechanically moved) Size of the lid and grate handles Stability Flammability WATCH THE VIDEO

## Key Points

- XXL chrome-plated grill grate with a diameter of 54 cm
- Unique 3-layer bowl with a handle - ensures excellent air circulation
- Sturdy lid with a thermometer, ventilation hole, handle, and hook
- Grill made of powder-coated steel, available in 5 trendy colors
- Lightweight construction (weight: approx. 10 kg)
- Stable legs, including 2 equipped with transport wheels - easily move the grill to any spot in the garden or terrace
- Lower shelf for easy organization and storage (e.g., accessories or charcoal)
- Adjustable air circulation cover
- Main bowl: ø 56.5 cm
- Size of lower shelf: 48 x 54 cm
- Diameter of wheels: 16.5 cm
- Weight: approx. 10 kg
- Fire pit: ø 54.5 cm x 17 cm
- Diameter of coal grate: 40 cm
- Height of grate: 82 cm
- Diameter of grate: 54 cm
- Depth of fire pit: 10.5 cm
- Distance between grate rods: 14 mm
- Coal bowl: 1 mm
- Grate rods: 4 mm
- Coal grate rods: 2.5 mm
- Other components: above 0.7 mm
- The product has been tested and approved for contact with food – it has an LFGB report that complies with European Regulation 1935/2004
- The product meets all dimensions and features in accordance with the standard for charcoal grills EN 1860-1:2013 + A1:2017
- Minimum thickness of the sheet metal of all elements, including the fuel bowl, lid, and ashtray
- Minimum distance between grate rods of 20 mm
- Minimum depth of the fuel bowl of 6 cm
- Presence of handle(s) for the grate (if the grate is not mechanically moved)
- Size of the lid and grate handles
- Stability

- 
- Flammability
