SPLITTING AXE 1500G FIBERGLASS HANDLE

Overview

A splitting axe with a wedge for professional use and everyday use in a household. Thanks to a well-profiled blade, it effectively chops and splits wood. The durable blade is made of hardened C45 steel, hot-forged. With a hardness of 48-58 HRC, the axe is characterized by high resistance to wear and effectiveness even when chopping hard wood. The handle of the axe is made of fiberglass reinforced with plastic, which increases its durability and resistance to damage. The handle is coated with a TPR coating, which stabilizes the grip and improves work comfort, reducing fatigue even during prolonged use. blade material: carbon steel C45, hardened, hot-forged; handle material: fiberglass, TPR; hardness: 48-58 HRC

Key Technical Specifications

Type	splitting
Brand	Yato
Symbol	YT-79981
Weight	1500 g
Hardness	48-58 HRC
Application	wood chopping, splitting small and medium-sized trunks up to 25 cm, preparing kindling, gardening, construction and forestry work
Grip material	fiberglass
Handle length	800 mm
Producer code	5906083112652
Head treatment	tempered, painted
Manufacturing process	hot-forged
Material of hammer face	#45 carbon steel

Key Points

- Blade material: carbon steel C45, hardened, hot-forged
- Handle material: fiberglass with TPR coating
- Hardness: 48-58 HRC
- Handle length: 800 mm
- Weight: 1500 g
- For chopping and splitting small and medium trunks up to 25 cm
