VEHICLE RAMP 3T 2PCS BLACK

Overview

The car ramp set allows for the safe lifting of a vehicle to perform basic service work, undercarriage inspections, or maintenance tasks. The durable PP (polypropylene) construction ensures good load resistance and stability during wheel access. With compact dimensions, the ramps are easy to store and convenient to use in both private garages and small workshops. Key product features: High load capacity of the ramps - 1.5 tons each - allows for supporting vehicles weighing up to 3 tons. Optimal ramp length of 90 cm and width of 33 cm increases stability during entry and reduces the risk of wheel slippage. Raised working platform - with a maximum ramp height of 20 cm and platform height of 17 cm - provides easy access to the vehicle. Stable surface measuring 26 x 29 cm provides secure support for wheels. Durable PP (polypropylene) material maintains resistance to pressure, moisture, and typical garage conditions.

Key Technical Specifications

Pcs	2
Brand	Yato
Symbol	YT-55672
Material	PP
Dimensions	200x330x900 mm
Application	for servicing or unloading light vehicles, garden equipment, machinery, carts, motorcycles, and wheeled devices
Producer code	5906083132773
Max. tire width	290 mm
Wheel lift height	170 mm
Load-bearing capacity	3 (1.5 x2) t

Key Points

- High load capacity of the ramps - 1.5 tons each - allows for supporting vehicles weighing up to 3 tons
- Optimal ramp length of 90 cm and width of 33 cm increases stability during entry and reduces the risk of wheel slippage
- Raised working platform - with a maximum ramp height of 20 cm and platform height of 17 cm - provides easy access to the vehicle
- Stable surface measuring 26 x 29 cm provides secure support for wheels
- Durable PP (polypropylene) material maintains resistance to pressure, moisture, and typical garage conditions
