

Yato | Code YT-78170 | Sku 1078170

Bits with Magnetic Ring and Limiter 2pcs 50mm PH2

Overview

Precise Screwing Without Damage The YT-78170 screwdriver bits are a practical solution for precise screwing of PH2 screws, especially in assembly and finishing work. The depth limiter facilitates control of the screw's seating and protects the material's surface from damage. The built-in magnet stabilizes the screw on the bit, speeding up work and improving comfort, especially when working with one hand. The bits are made of S2 steel, which has increased resistance to twisting and wear. The sandblasted surface increases durability and improves grip on the screw head, reducing the risk of the bit slipping during work. The bits are suitable for installing drywall, furniture, and finishing elements, where accuracy and repeatable results are essential. PH2 Profile Depth Limiter Built-in Magnet S2 Steel Sandblasted Surface PH2 profile – for popular cross screws Length 50 mm – convenient work even with slightly recessed screws Depth limiter – protects the material and ensures repeatable assembly Built-in magnet – stable holding of the screw S2 steel – resistance to wear and loads Hardness HRC 58-60 – extended lifespan of the bit Sandblasted surface – better grip and durability Detailed Technical Data: Profile: PH2 Length: 50 mm Function: depth limiter Feature: built-in magnet Material: S2 steel Hardness: HRC 58-60 Finish: sandblasted surface Set includes: 2 PH2 bits, 1/4", 50 mm with limiter and magnet

Key Technical Specifications

Pcs	2
Tip	Phillips
Brand	Yato
Length	50 mm
Symbol	YT-78170
Limiter	yes
Hardness	58-60 HRC
Material	S2
Holder size	1/4" (6.3 mm)

Producer code	5906083129957
Finish	sandblasted
Toolholder type	hexagonal
Phillips (PH) tip size	PH2

Key Points

- The depth limiter facilitates control of the screw's seating and protects the material's surface from damage.
- The built-in magnet stabilizes the screw on the bit, speeding up work and improving comfort, especially when working with one hand.
- The bits are made of S2 steel, which has increased resistance to twisting and wear.
- The sandblasted surface increases durability and improves grip on the screw head, reducing the risk of the bit slipping during work.
- The bits are suitable for installing drywall, furniture, and finishing elements, where accuracy and repeatable results are essential.
- PH2 profile – for popular cross screws
- Length 50 mm – convenient work even with slightly recessed screws
- Depth limiter – protects the material and ensures repeatable assembly
- Built-in magnet – stable holding of the screw
- S2 steel – resistance to wear and loads
- Hardness HRC 58-60 – extended lifespan of the bit
- Sandblasted surface – better grip and durability
- Profile: PH2
- Length: 50 mm
- Function: depth limiter
- Feature: built-in magnet
- Material: S2 steel
- Hardness: HRC 58-60
- Finish: sandblasted surface
- Set includes: 2 PH2 bits, 1/4", 50 mm with limiter and magnet
