## BRAZED DIAMOND FINGERS MILLING BIT 2-38MM M14

### Overview

**Exceptional Durability** The YT-61783 diamond cone bur is designed for precise machining, edge bevelling, and enlarging existing holes in hard construction materials. The conical shape of the tool allows for smooth enlargement of holes of various diameters and precise adjustment of their dimensions without the risk of damaging the workpiece material. The diamond coating ensures high work efficiency and long lifespan during machining of ceramic tiles, stoneware, sintered stone, natural stone, and other finishing materials.

**Precise hole enlargement** Long lifespan Precise machining Universal M14 mounting For hard materials Conical design allowing for gradual enlargement of holes Durable diamond coating resistant to wear Designed for bevelling, calibrating, and milling holes M14 mounting for angle grinders Suitable for ceramic tiles, stoneware, sintered stone, natural stone, and other hard materials Allows for correction of the position and diameter of previously made holes

**Detailed Technical Data:** Diameter range: 2-38 mm Working length: 43 mm Shape: Conical Mounting: M14 (for angle grinders) Application: bevelling, calibrating, milling holes, enlarging holes Material to be processed: ceramic tiles, stoneware, quartz sintered stone, natural stone, other hard finishing materials Usage warnings: Warning! Always use personal safety equipment at work.

### Key Points

- The conical shape of the tool allows for smooth enlargement of holes of various diameters and precise adjustment of their dimensions without the risk of damaging the workpiece material.
- The diamond coating ensures high work efficiency and long lifespan during machining of ceramic tiles, stoneware, sintered stone, natural stone, and other finishing materials.
- Conical design allowing for gradual enlargement of holes
- Durable diamond coating resistant to wear
- Designed for bevelling, calibrating, and milling holes
- M14 mounting for angle grinders
- Suitable for ceramic tiles, stoneware, sintered stone, natural stone, and other hard materials

- 
- Allows for correction of the position and diameter of previously made holes
  - Diameter range: 2-38 mm
  - Working length: 43 mm
  - Shape: Conical
  - Mounting: M14 (for angle grinders)
  - Application: bevelling, calibrating, milling holes, enlarging holes
  - Material to be processed: ceramic tiles, stoneware, quartz sintered stone, natural stone, other hard finishing materials
