BRAZED DIAMOND FINGERS MILLING BIT 10-25MM M14

Overview

Exceptional Durability Diamond drill bit YT-61785 designed for precise reaming, calibrating, and finishing holes in hard construction materials. The tapered working design allows for gradual enlargement of existing holes and precise adjustment of their dimensions to the installed systems. The diamond coating ensures high processing efficiency and long tool life even during intensive use. Precise hole enlargement Long lifespan Precise machining Universal M14 mounting For hard materials The drill bit performs excellently when correcting holes made in ceramic tiles, porcelain stoneware, quartz sinters, natural stone, and other hard finishing materials. The M14 mounting allows for direct installation in angle grinders. Working diameter range: 10-25 mm Total length: 65 mm Tapered-cylindrical design for precise enlargement and calibration of holes Durable diamond coating resistant to wear Designed for bevelling, milling, and correcting hole diameters M14 mounting for angle grinders Suitable for ceramic tiles, porcelain stoneware, sinters, natural stone, and other hard materials Allows precise fitting of holes for conduits, pipes, and installation hardware Detailed Technical Data: Working diameter range: 10-25 mm Total length: 65 mm Tapered-cylindrical design for precise enlargement and calibration of holes Mounting: M14 (for angle grinders) Application: bevelling, milling, and correcting hole diameters Material to be processed: ceramic tiles, porcelain stoneware, quartz sinters, natural stone, other hard finishing materials Usage warnings: Warning! Always use personal safety equipment at work.

Key Points

- The tapered working design allows for gradual enlargement of existing holes and precise adjustment of their dimensions to the installed systems.
- The diamond coating ensures high processing efficiency and long tool life even during intensive use.
- The drill bit performs excellently when correcting holes made in ceramic tiles, porcelain stoneware, quartz sinters, natural stone, and other hard finishing materials.
- The M14 mounting allows for direct installation in angle grinders.
- Working diameter range: 10-25 mm

-
- Total length: 65 mm
 - Tapered-cylindrical design for precise enlargement and calibration of holes
 - Durable diamond coating resistant to wear
 - Designed for bevelling, milling, and correcting hole diameters
 - M14 mounting for angle grinders
 - Suitable for ceramic tiles, porcelain stoneware, sinters, natural stone, and other hard materials
 - Allows precise fitting of holes for conduits, pipes, and installation hardware
 - Mounting: M14 (for angle grinders)
 - Application: bevelling, milling, and correcting hole diameters
 - Material to be processed: ceramic tiles, porcelain stoneware, quartz sinters, natural stone, other hard finishing materials
