BRAZED DIAMOND FINGERS MILLING BIT 20-50MM M14

Overview

Precise Hole Milling Diamond drill bit YT-61786 designed for precise machining, calibrating, and enlarging holes in hard construction materials. Trapezoidal working surface allows effective milling of larger diameters, beveling edges, and correcting dimensions of previously made holes. Thanks to the large surface covered with diamond grit, the tool ensures high work efficiency and long lifespan even during intensive use. The drill bit excels in processing ceramic tiles, stoneware, quartz sinters, natural stone, and other hard finishing materials. M14 mounting allows for quick installation directly in an angle grinder. Precise enlargement of holes Long lifespan Precise machining Universal M14 mounting For hard materials Working diameter range: 20-50 mm Total length: 42 mm Trapezoidal working design for effective enlarging and calibrating of holes Large working surface covered with durable diamond grit Designed for beveling, milling, and correcting the diameter of holes Allows processing of larger holes and finishing their edges M14 mounting for angle grinders Suitable for ceramic tiles, stoneware, quartz sinters, natural stone, and other hard materials Ideal for preparing holes for conduits, pipes, installation boxes, and mounting elements Detailed Technical Data: Working diameter range: 20-50 mm Total length: 42 mm Working design: trapezoidal, for effective enlarging and calibrating of holes Working surface: large, covered with durable diamond grit Application: beveling, milling, correcting the diameter of holes Functionality: allows processing of larger holes and finishing their edges Mounting: M14 for angle grinders Materials: ceramic tiles, stoneware, quartz sinters, natural stone, and other hard materials Ideal for: preparing holes for conduits, pipes, installation boxes, and mounting elements Usage warnings: Warning! Always use personal safety equipment at work.

Key Points

- Trapezoidal working surface allows effective milling of larger diameters, beveling edges, and correcting dimensions of previously made holes.
- Thanks to the large surface covered with diamond grit, the tool ensures high work efficiency and long lifespan even during intensive use.

-
- The drill bit excels in processing ceramic tiles, stoneware, quartz sinters, natural stone, and other hard finishing materials.
 - M14 mounting allows for quick installation directly in an angle grinder.
 - Working diameter range: 20-50 mm
 - Total length: 42 mm
 - Trapezoidal working design for effective enlarging and calibrating of holes
 - Large working surface covered with durable diamond grit
 - Designed for beveling, milling, and correcting the diameter of holes
 - Allows processing of larger holes and finishing their edges
 - M14 mounting for angle grinders
 - Suitable for ceramic tiles, stoneware, quartz sinters, natural stone, and other hard materials
 - Ideal for preparing holes for conduits, pipes, installation boxes, and mounting elements
 - Working design: trapezoidal, for effective enlarging and calibrating of holes
 - Working surface: large, covered with durable diamond grit
 - Application: beveling, milling, correcting the diameter of holes
 - Functionality: allows processing of larger holes and finishing their edges
 - Mounting: M14 for angle grinders
 - Materials: ceramic tiles, stoneware, quartz sinters, natural stone, and other hard materials
 - Ideal for: preparing holes for conduits, pipes, installation boxes, and mounting elements
