BRAZED DIAMOND FINGERS MILLING BIT 9-38MM M14

Overview

Precision Hole Calibration Diamond cutter YT-61787 designed for precise calibration, bevelling, and enlarging holes in hard building materials. Funnel-shaped, expanding working design allows for smooth diameter increase, edge smoothing, and precise fitting of dimensions to installation components. Large surface covered with high-quality diamond grit ensures effective processing and long tool life. The cutter performs excellently during the processing of ceramic tiles, stoneware, quartz sinters, natural stone, and other hard finishing materials. M14 mounting allows for quick installation directly in an angle grinder. Precision enlargement of holes Long lifespan Precision machining Universal M14 mounting For hard materials Funnel-shaped working design for gradual enlargement and calibration of holes Durable diamond grit resistant to wear Designed for bevelling, milling, and correcting hole diameters Enables precise edge finishing and fitting of holes for installation components Large working surface ensuring high processing efficiency M14 mounting for angle grinders Suitable for ceramic tiles, stoneware, quartz sinters, natural stone, and other hard materials Detailed Technical Specifications: Working diameter range: 9-38 mm Working length: 45 mm Total length: 42 mm Usage warnings: Warning! Always use personal safety equipment at work.

Key Points

- Funnel-shaped, expanding working design allows for smooth diameter increase, edge smoothing, and precise fitting of dimensions to installation components.
- Large surface covered with high-quality diamond grit ensures effective processing and long tool life.
- The cutter performs excellently during the processing of ceramic tiles, stoneware, quartz sinters, natural stone, and other hard finishing materials.
- M14 mounting allows for quick installation directly in an angle grinder.
- Funnel-shaped working design for gradual enlargement and calibration of holes
- Durable diamond grit resistant to wear
- Designed for bevelling, milling, and correcting hole diameters

-
- Enables precise edge finishing and fitting of holes for installation components
 - Large working surface ensuring high processing efficiency
 - M14 mounting for angle grinders
 - Suitable for ceramic tiles, stoneware, quartz sinters, natural stone, and other hard materials
 - Working diameter range: 9-38 mm
 - Working length: 45 mm
 - Total length: 42 mm
