BRAZED DIAMOND FINGERS MILLING BIT 9-50MM M14

Overview

Precise Hole Calibration Diamond cutter YT-61788 designed for precise calibration, beveling, and enlarging holes in hard construction materials. Funnel-shaped, expanding working structure allows for smooth diameter increase, edge smoothing, and precise dimension fitting for installation components. Large surface covered with high-quality diamond grit ensures effective processing and long tool life. The cutter performs excellently during the processing of ceramic tiles, stoneware, quartz sinters, natural stone, and other hard finishing materials. M14 mounting allows for quick installation directly in an angle grinder. Precise hole enlargement Long lifespan Precise processing Universal M14 mounting For hard materials Funnel-shaped working structure for gradual enlarging and calibrating of holes Durable diamond grit resistant to wear Designed for beveling, milling, and correcting hole diameters Enables precise edge finishing and fitting holes for installation components Large working surface ensuring high processing efficiency M14 mounting for angle grinders Suitable for ceramic tiles, stoneware, quartz sinters, natural stone, and other hard materials Detailed Technical Data: Working diameter range 9-50 mm Working length 45 mm Total length: 42 mm Usage warnings: Warning! Always use personal safety equipment at work.

Key Points

- Funnel-shaped, expanding working structure allows for smooth diameter increase, edge smoothing, and precise dimension fitting for installation components.
- Large surface covered with high-quality diamond grit ensures effective processing and long tool life.
- The cutter performs excellently during the processing of ceramic tiles, stoneware, quartz sinters, natural stone, and other hard finishing materials.
- M14 mounting allows for quick installation directly in an angle grinder.
- Funnel-shaped working structure for gradual enlarging and calibrating of holes
- Durable diamond grit resistant to wear
- Designed for beveling, milling, and correcting hole diameters

-
- Enables precise edge finishing and fitting holes for installation components
 - Large working surface ensuring high processing efficiency
 - M14 mounting for angle grinders
 - Suitable for ceramic tiles, stoneware, quartz sinters, natural stone, and other hard materials
 - Working diameter range 9-50 mm
 - Working length 45 mm
 - Total length: 42 mm
